GODDARDS GREEN GARDENS - Cranbrook

This beautiful garden and orchard extend to about 5 acres, surrounding a beautiful 500 year-old clothier's hall . It was originally laid out in 1920s and has been redesigned over the past 27 years to combine traditional and modern planting schemes, providing variety and interest throughout the year. The present design of the garden has evolved since John and Linde Wotton bought Goddards Green in 1992. We had an excellent exclusive tour of the Gardens. John was outstanding and was extremely knowledgeable about all of his trees, shrubs ,plants and fruit.

We were extremely lucky with the weather as it only started to rain when we were due to have coffee and cake. So we all enjoyed that in the dining room of the magnificent House itself.
